

QUESTION :

An organization is maintaining the data of employee according to cadre of employee with following parameters: name, id, designation, salary, promotion status. Apply the constructor overloading to implement it.

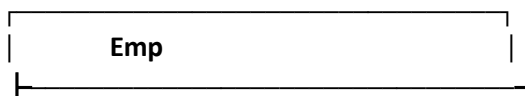

EXECUTION STEPS :

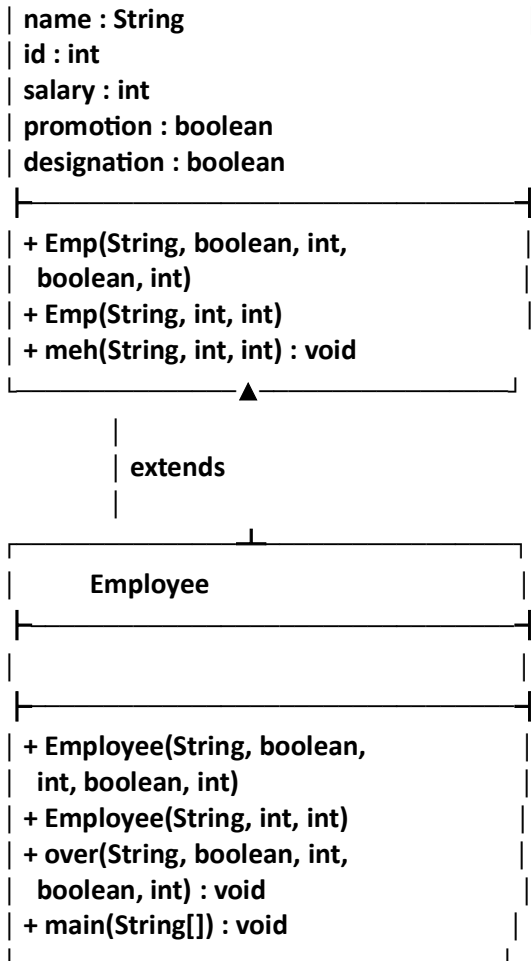

- **Open IntelliJ IDEA** and create a new Java project with the required JDK.
- **Create a Java class named `Employee`** and paste the given program. Since `Employee` is the public class, save the file as `Employee.java`.
- **Run the program** by clicking the green **Run** button beside the `main()` method.
- The program creates two `Employee` objects using **different constructors**:
 - `em` uses the constructor with **5 parameters**.
 - `em2` uses the constructor with **3 parameters**.
- **View the output** in the IntelliJ IDEA console. The program displays employee salary, ID, name, designation, and promotion details.

ALGORITHM :

- **Start** the program.
- Create a class `Emp` with the data members:
 - `name`
 - `id`
 - `salary`
 - `promotion`
 - `designation`
- Create the **first constructor** in `Emp` with five parameters:
`name, designation, id, promotion, salary`.
- Create the **second constructor** in `Emp` with three parameters:
`name, id, salary`.
- Create the `meh()` method to display the employee's name, ID, and salary.
- Create a class `Employee` that **inherits** from `Emp`.
- Create two constructors in `Employee` corresponding to the two constructors of `Emp` and call the parent constructors using `super()`.
- Create the `over()` method to display complete employee details including designation and promotion status.
- In the `main()` method, create the first employee object `em` using the **five-parameter constructor**.
- Call `meh()` and `over()` to display employee information.
- Create the second employee object `em2` using the **three-parameter constructor**.
- Call `meh()` to display the second employee's information.
- **Stop** the program.

OUTPUT :

```
"C:\Program Files\Java\jdk-24\bin\java.exe" "-javaagent:C:\Program Files\JetBrains\IntelliJ IDEA 2026.1.4\lib\idea_rt.jar=52634" -Dfile.encoding=UTF-8 -Dsun
The salary of a person is: 456600
The id of a person is: 222
The name of a person is: manodhara
----- Employee Details -----
The id of a person is: 345
The name of a person is: bhanu
The salary of a person is: 200000
The designation of a person is: false
The promotion of a person is: true

The salary of a person is: 500000
The id of a person is: 300
The name of a person is: manikanta
